

Capability Statement

Groundwater - Environmental - Geospatial

EarthData
INCORPORATED

• Water • Land • Geospace •
Solutions for Tomorrow. Today.

Core Expertise

Earth Data Incorporated has completed more than 4,800 projects involving the collection, analysis, management and distribution of environmental data with deep expertise in technical environmental field services and hydrogeological data collection and analysis at hazardous waste sites within US EPA Region III. The Company has recent, relevant experience integrating, storing, editing, analyzing, and displaying geographically-referenced information in client/server and web-based environments.

Technical Environmental Field & Consulting Services

- Environmental drilling
- Well construction, redevelopment and testing
- Direct push and core sampling
- Aquifer pumping tests, packer testing and permeability testing
- Water quality sampling
- Borehole geophysical logging and video survey

GIS and Geospatial Analysis Services

- GIS/GPS data collection & remote sensing; mobile data capture
- Aerial LiDAR and spatial data analysis
- Geographic Information System application engineering
- Data visualization services

Differentiators

- Earth Data's leadership and technical personnel hold security clearances, and its headquarters in Centreville, Maryland is a DSS Cleared Facility.
- All Earth Data licensed well drillers and field personnel are OSHA Remedial Response Health and Safety Training compliant.

Past Performance

U.S. Army Corp of Engineers, Army Geospatial Center (AGC). Military Geospatial Support Contract W5J9CQ-15-D-0001. FOUO. Completed one of the largest Urban Tactical Planner (UTP) dataset projects ever awarded by AGC.

U.S. Army Corp of Engineers-Philadelphia District. Contract W912BU-08-R-0041. Step-drawdown pumping tests, well redevelopment and downhole video surveys in 28 relief wells at Prompton Dam, Wayne County, PA.

U.S. Army Corp of Engineers-Philadelphia District. Contract W912BU-09-P-0153. Well redevelopment and testing and borehole video surveys in recovery wells at the former Cosden Chemical Coatings Superfund Site.

Anne Arundel County, Maryland Contract W744450; Web-based Integration of Well Evaluation Reports. Designed and implemented geo-referenced database and interface for online access to data for 58 production wells.

Company Data

Company History

Earth Data Incorporated is a full-service groundwater, environmental and geospatial consulting firm that has continuously provided services throughout the Eastern U.S. for more than 40 years. Headquartered just outside of Washington DC, the firm employs professional and technical specialists including GIS/geospatial professionals, hydrogeologists, geologists, water resource engineers, licensed well drillers, environmental scientists, and field technicians and construction inspectors. Earth Data routinely services public and private clients directly and in supporting roles to other A/E firms.
